

MAIN STAGE CALLING

CALLING THE MAIN SESSION

Make sure you are on 'Bingo' and not advert mode.

After you have finished the opening script then you can start to call the game.

1. You should use the **'GREEN BUTTON'** to generate the first number. To call that number, start by breaking the number down then saying the full number i.e. "3 and 4... 34". Remember to leave a slight pause between the numbers. You should then press the **'GREEN BUTTON'** again to generate the next number and carry on until you hear a shout for the single line.
2. Once you hear a shout you should finish the number you have started to say and then say "we've got a claim on the number 45 are there any further claims?"
 - If it is on an electronic board you should say "it's on a board, checking position 1354" if it is a valid claim, you should press button '3' to show the checked card on the Main Hall screens; then say "that's a good single line claim number 45 appears on that card".
 - o You should then ask "if there are any more claims" and listen for any further claims.
 - o If there are no more claims you should close the line by saying "no more claims that's your single line closed with the one winner, well done. That now takes us onto your two lines, your next number is...."
 - If the claim is on paper the floor person will need to check the claim so you should say. "We have 1 claim on the number 45 are there any further claims? No further claims, checking paper ticket with you thank you___"
 - o You will then need to click 'Valid Check' on the caller's keyboard to allow you to see the valid check number.
 - o The floor person will call out the perm number, page colour, serial number and game being played. You need to listen closely and make sure this matches the check number on screen. In some clubs, the caller will need to enter the last 2 digits of the 'check number' on the keyboard and click 'Enter'. If the

number matches, click 'Enter' then button '3' on the caller's key board to display the ticket on the screens and to validate the claim, then say... "Thank you, that's a valid claim, 45 appears on that card, are there any more claims? *Pause to listen for further claims* No more claims then, that's your single line closed with the one winner, well done."

3. You would then carry on the same process for the two lines and full house.
4. Once you have the full house winner on the page you need to reset the game to move onto the next page, you do this by double clicking the **RED BUTTON**.
5. Before the 2nd half starts, you should announce the prize money for the upcoming games as this might have increased from the 1st half. It is good practice to find out what the session pay-out will be, the prizes might increase from page to page. Click 'info' on the caller's key board to display this.
